

# CONFIDENTIAL ON-SITE PAPER SHREDDING

Your Shredding, Compliance and Recycling Force

## Client Protection

Demonstrating the confidence, resources, and ability to stand behind data protection responsibilities, C.O.P.S. provides Downstream Data Coverage for our clients.

### What is Downstream Data Coverage?

It's professional liability insurance created to cover the unique exposures related to outsourcing data-related services to third-party contractors.

### Why do we use this coverage?

- In the event of a data breach, Downstream Data Coverage covers expenses to the full limit of the policy.
- Coverage applies to professional liabilities for all media, including electronic, sent to the service provider.
- It's backed by some of the most reputable names in data protection and insurance. (The National Association of Information Destruction, Lloyds, and Association Insurance Management.)
